

Samuel Gjabel

Senior frontend developer & UX / UI enthusiast

A passionate frontend developer with almost **12 years** of experience, I specialize in building responsive web and mobile applications with a strong focus on **UX/UI**. Currently diving into the web3 world, I continuously embrace new technologies and seek to improve user experiences through innovative solutions.

Employment History

Software developer at SMS defence, s.r.o., Dubnica nad Váhom, Slovakia

JANUARY 2012 – 2015

In this role, I was responsible for maintaining the company's software and website. This was my first exposure to frontend development, where I focused on learning new technologies, such as React, HTML, and CSS, to develop the company's internal web applications and ensure smooth operation.

Technologies Used: React, HTML, CSS, alongside web development fundamentals

Frontend developer at ambitas, s.r.o., Bratislava

2015 – 2018

As a mid-level developer, I built multiple web applications and a mobile app for various clients across Slovakia and Europe. I worked with technologies such as React, React Native, Redux, and MobX to deliver solutions for many industries, providing both web and mobile applications.

Technologies Used: React, React Native, Redux, MobX, Jest (unit tests) along with other industry-standard tools

Frontend Leader & Senior Developer at Volanté Systems, Toronto

SEPTEMBER 2018 – AUGUST 2019

In this role, I was responsible for leading the frontend team and developing a management system for POS (point-of-sale) kiosks. As a team leader, I guided and mentored junior developers, ensuring high-quality development practices. I was responsible for the selection of technologies and maintaining the development pipeline.

Technologies Used: React, SCSS, Redux, MobX, Jest (unit tests) and a variety of complementary technologies

Senior Lead Frontend Developer at 4ka.sk, Bratislava

AUGUST 2019 – AUGUST 2021

At [4ka.sk](#), a telecommunications company with over a million users in Slovakia, my primary role was to lead the rebranding and rebuild of their management system for customers, as well as revamping the [4ka.sk](#) landing page with a focus on improving user experience. I oversaw the integration of the best UX practices while handling the frontend development.

Technologies Used: React, React Native, Redux, MobX, Jest (unit tests), Detox (e2e RN tests), Tailwind, Next.js, in addition to other modern frameworks and tools

Senior Frontend Developer at Aliter technologies, Bratislava

AUGUST 2021 – DECEMBER 2021

My responsibility in this short-term role was to set up a new project from scratch and rewrite the existing management system using React and modern web technologies.

Technologies Used: React, Jest (unit tests), Next.js, Gatsby, along with other relevant technologies

Senior Frontend Developer at Jigx.com, Seattle

DECEMBER 2021 – OCTOBER 2024

At Jigx, I was part of a team developing a no-code platform, working on both web applications using React and mobile applications using React Native. My responsibilities included designing and implementing high-quality features that integrated seamlessly across the application. I focused on delivering an optimal user experience, ensuring that the code was testable, maintainable, and met performance standards.

Technologies Used: React, React Native, Recoil, Redux, Jest (unit testing), Detox (end-to-end testing for React Native), Maestro (e2e RN tool), Tailwind, and other advanced development technologies.

Education

Electro engineer high school, Dubnica nad Váhom

2005 – 2009

Bachelor at STU Bratislava university, Bratislava

2010 – 2013

Docker

Hobbies

I enjoy exploring new places through travel, discovering unique beers, listening to music, and spending time with friends. I am also passionate about continuously learning new things and staying curious about the latest developments in technology and beyond.
